Brain Box 188 series

Science in Action

Electronics Kit

188 ideas for constructing different circuits on a base board. The circuit boards can be activated by magnet, water, light, touch or sound and produce different kinds of reactions such as flashing bulbs, motorized fans, flying discs and various sound effects. Examples include a water activated doorbell, sound activated doorbell, magnetically activated motors, and electric fan.

All components have snap fasteners which make assembly very easy and quick. All components are coded so that young children (and adults!) can easily follow construction diagrams.

The kit is suitable for primary students and lower secondary.

The fun way to learn electronics.

What does it cost?

**STAV Individual members and subscribers** $43-00 incl. GST, plus postage & handling $6-60 (first kit) and $2-20 per each extra kit.

**Non-members** $48-00 incl. GST, plus postage & handling $6-60 (first kit) and $2-20 per each extra kit.
