20% of the Psychology Unit 4 exam has been allocated for questions about the Research Investigations. These will be short answer questions.

This session will give you ideas and strategies to advise your students and help them to understand the stages of research designs and investigations, apply the principles of research and analyse data from research studies and investigations.

John Reece, the Chief Examiner, will discuss the questions and how students might be expected to use the knowledge and skills gained in Area of Study 3 and in their research investigation to answer questions about other research and investigations.

After this discussion you will have the opportunity to work on examples of possible exam questions.

Light refreshments included.

Research Methods in Psychology Unit 4 PD Registration Form
